

ABA: 69838337

IC

The image displays a brain scan, likely a PET or SPECT scan, with a color scale ranging from blue (low activity) to yellow/red (high activity). A prominent area of high activity is visible in the upper central region, possibly corresponding to the frontal or parietal cortex. The rest of the brain shows lower activity levels, represented by blue. A white crosshair is overlaid on the image, with the vertical line passing through the center of the high-activity region.
