

ABA:70634236

VA/VL

This is a brain PET scan image, likely a coronal section, showing metabolic activity. The image is color-coded, with blue representing lower activity and yellow/green representing higher activity. A prominent area of high activity is visible in the central region, possibly the basal ganglia or thalamus, and another smaller area is visible in the upper left quadrant. The image is overlaid with a white crosshair, and the text 'ABA:70634236' is in the top left and 'VA/VL' is in the bottom left.
